Goal of the Training

In theoretical and practical lessons the participants will learn how to use concepts and methods of project planning, financial management and implementation of projects. These concepts especially concern projects in the scope of development cooperation (DC). Graduates gain a profound knowledge of Strategies & Activity Tools and are qualified to manage projects according to the framework requirements by donors of development cooperation and humanitarian aid. Working in international Renewable Energy Projects.

Target Group

We invite graduates from technical colleges and universities in the fields of social sciences, economics, natural sciences, humanities, engineering, law, geography or with comparable degrees to apply for our program. Especially, individuals with professional experience in development cooperation or the non-profit sector in general who are interested in learning tools of project management are welcome to apply.

Training Procedure

The duration of the training is 6 months in total, including 2 months of internship / job followed by the exam week. Parts of the program will be conducted in collaboration with lecturers from the University of Kassel and the DITSL (German Institute of Tropical and Subtropical Agriculture). Most of our training programs we conduct with lecturers from the field. The availability of our trainers can therefore change. Changes in the course content are possible. Lecturers include professionals from internationally operating institutions and companies. These lectures also provide a direct contact to the future working environment. Parts of the program will be held in conjunction with the participants of the training course “International Project Management” (IPM).
